## Librex Newsletter - April 2016

Hi Marc-Andre,

Here's the April edition of our Librex Newsletter, which has the goal of keeping you informed about various Librex best practices and presenting you some of our new features.

### Security, Authentication & Encryption

In a context where cloud computing is more popular, multiple security enhancements were made in the latest versions of Librex. To benefit from them, simply update your server continuously and configure your server by following our recommendations.

This is relevant in a local network behind a firewall because you will avoid attacks that could come from within your organization. And it becomes even more important if your server is in the cloud or outside your firewall because it is visible and accessible to hackers.

For more information, please visit our page detailing how to [secure your Librex server](#).

### Librex Lunch & Learn - May 19th

Microsoft

[Register](#) to our Lunch and Learn to discover the new features of Librex 5 and its integration with the Microsoft platform (Azure and SharePoint).
