## Librex Newsletter - June 2015

Hi Marc-Andre,

Here's the June edition of our Librex Newsletter, which has the goal of keeping you informed about various Librex best practices and presenting you some of our new features.

## The Power of Regular Expressions

Librex offers multiple converters ready to extract a value under a specific format, for example to search and convert a date format or to adjust a text based on a list of values (enumeration). And new converters keep being added to Librex.

But if your business logic isn't covered by a current Librex converter, we recommend that you build an extraction automatism that uses a regular expression (REGEX) to identify your pattern. Here are a few examples of data types that can be extracted using a REGEX:

- Credit Card Number
- Tax Number
- Social Security Number
- Phone Number

- Adress
- Email
- Amount
- ...

## Librex Now Speaks Spanish

Since version 4.7.2, Librex is available in Spanish.

To change the language of one of your users, go to the administration window, section "Users", and modify the language of the concerned user.

You may also define Spanish as the default system language from the system parameters window.

Your feedback is welcome if you find translations that could be enhanced.

¡Vamos Librex!

Thank you for reading our Librex newsletter. We appreciate your interest in our solution and invite you to contact us for any question.

We also invite you to follow us on [Twitter](#) or like us on [Facebook](#) to get all the latest news on Corium and Librex.

To consult the complete Librex documentation, visit our [Librex Documentation Portal](#)

If you would like to read the past editions of our Librex newsletter, we invite you to visit the following page: [Librex Newsletter](#)

Finally, if you think some of your contacts would be interested to subscribe to our Librex newsletter, feel free to invite them to subscribe here: [Subscribe to Librex Newsletter](#)
