## Librex Newsletter - May 2013

Hi ,

It's been a while since we've given you news, but we've decided to restart the publication of our Librex newsletter to keep you informed about some of Librex best practices and about Librex new functionalities.

### Did you know that...

Librex allows you to capture your content whatever the source is. You may scan paper documents, but you can also capture electronic ones manually or through an importation folder. Also, you can capture faxes through our LibrexFax application, or capture anything that can be printed with our virtual printers. You need to capture emails? Just install our new Outlook Plug-In and within a few minutes, your emails will be accessible in Librex.

Automatic importation folders are a very powerful way to capture all your content that's already electronic. Just drop those documents in Librex importation folders and use data extraction automatism and recognition rules to automatically classify them and make them quickly available to everyone in your organization.

## ... and that users are now unlimited in Librex!

Indeed! Since Librex 3.0, you can create users for all employees in Librex for free. By default, they will be connected to our capture and consultation counters that have been automatically set to 1000 pages/documents per month for all our customers. If you had already bought users in Librex, they will continue to be users with unlimited consultation.

Also, Librex can now be connected to your Active Directory, so the importation of the all the users from your organization can be done very quickly.

Thank you for reading our Librex newsletter. We appreciate your interest in our solution and invite you to contact us for any question.

We also invite you to follow us on [Twitter](#) or like us on [Facebook](#) to get all the latest news on Corium and Librex.

If you think some of your contacts would be interested to subscribe to our Librex newsletter, feel free to invite them to subscribe here: [Subscribe to Librex Newsletter](#)
